RESEARCH STATEMENT

I am broadly interested in building intelligent robotic systems that can perceive, learn, and act in complex real-world environments. My research focuses on reinforcement learning, generative AI, and computer vision, with applications in navigation and motion planning for autonomous mobile robots. I am also interested in dexterous locomotion and manipulation, as well as long-horizon task and motion planning that enables robots to solve multi-step problems safely and efficiently.

EDUCATION

Doctor of Philosophy in Computer Science 2022 - Present
George Mason University, VA, USA

Master of Science in Computer Science 2022 - 2024
George Mason University, VA, USA
CGPA: 3.82/4.00

Bachelor of Science in Computer Science and Engineering 2016 - 2021
Ahsanullah University of Science and Technology, Dhaka
Thesis Title: Natural Language Video Captioning in Bengali Using Deep Learning
CGPA: 3.85/4.00

WORK EXPERIENCE

Graduate Research/Teaching Assistant, George Mason University Aug 2022 - Present

- Developed and implemented reinforcement learning and vision-language models for robot navigation and locomotion in complex environments. Focus on multimodal perception, motion planning algorithms for mobile robots, and deployment of autonomous systems.
- Supported teaching in programming and data analysis courses by helping students understand high-level and object-oriented programming concepts. Assisted with assignments, debugging, and practical problem-solving. Provided help through office hours, grading, and direct student feedback.

Lecturer, Ahsanullah University of Science and Technology Nov 2021 - Jul 2022

- Conducted lab sessions: Software Development, Compiler Design, Operating Systems. Guided diverse learners with patience, adaptability, and clear communication, fostering confidence and collaborative engagement.

Associate Software Engineer, Brain Station 23 Jan 2021 - Nov 2021

- Worked as a Machine Learning and AI Engineer on research problems including Image Forgery Detection, Automatic Radiology Report Generation, Medical Machine Reading Comprehension, and Unsupervised Clinical Trial Data Analysis. Workload included programming, design and development to launch products.

TECHNICAL SKILLS

Work experience with C++, Python, PyTorch, ROS, Isaac Lab etc.

Journal

PROFESSIONAL DEVELOPMENT

- Generative Adversarial Networks (GAN) Specialization, Coursera (DeepLearning.AI), Completed 2025
- Deep Learning Specialization, Coursera (DeepLearning.AI), Completed 2020

GRANTS AND ACHIEVEMENTS:

- ACCESS-CI Explore Compute Allocation (Co-PI), NSF ACCESS, 2025.
- “Outstanding Academic Achievement” (based on MS result)
- “Dean’s List of Honor” (based on B.Sc. result)
- Secured **2nd position** in Intra AUST Programming Contest Fall-17
